

Finally... A Non-Toxic Insect Barrier **SHIELD & SHEEN**

FLY PROTECTIVE SHIELD

**Tough enough for long-lasting protection,
Gentle enough for a pregnant brood mare!**

SHIELD & SHEEN is Better for Your Horse!

Repels Biting Insects

- Creates and maintains an active barrier with its unique, patented fatty acid formula

No Toxins or Pesticides

- Will not burn or irritate skin

Provides Wound Care Barrier

- Safe and effective for direct application to wounds

Helps Block West Nile Virus Transmission

- Repels West Nile Virus Mosquito vector

Enhances Coat's Sheen

- Essential fatty acids help condition hair shaft

SHIELD & SHEEN is Better for You!

Saves Time — And Money

- We may cost more than traditional fly repellents, but with our longer-lasting protection, your actual cost per week may be less!

Apply SHIELD & SHEEN!

I was impressed by Shield & Sheen Spray's ability to repel insects. The reapplication interval was from 2 to 3 days. I also used the Stick product on a particular horse that had a severe allergy to black flies and would develop pruritic, edematous lesions on the underbelly. Shield & Sheen Stick not only soothed the itch, but also seemed to accelerate the dermal healing process—and lasted up to 6 days. Shield & Sheen Spray and Stick products are now two of the tools in my practice and I use them virtually every day.

— Larry A. Metheny, DVM

Unique Double-mist sprayer propels product on the squeeze and the release reducing application time by 50%
